SQL Business Queries for Implementation & Business Operations Case Study

This document contains the highest-value SQL queries that answer real business questions for the CloudBridge Implementation project.

1. Project Status Summary

```
SELECT onboarding_status,  
       COUNT(*) AS total_projects  
FROM clients_onboarding  
GROUP BY onboarding_status;
```

The screenshot shows a SQL query result grid with two columns: 'onboarding_status' and 'total_projects'. The first row shows 'Completed' with a value of 245. The interface includes a 'Result Grid' tab, a 'Filter Rows' button, and a '+' icon to expand the table.

onboarding_status	total_projects
Completed	245

Business Purpose: Monitor implementation workload.

2. Average Implementation Duration

```
SELECT ROUND(AVG(days_to_onboard),2) AS avg_implementation_days  
FROM clients_onboarding;
```

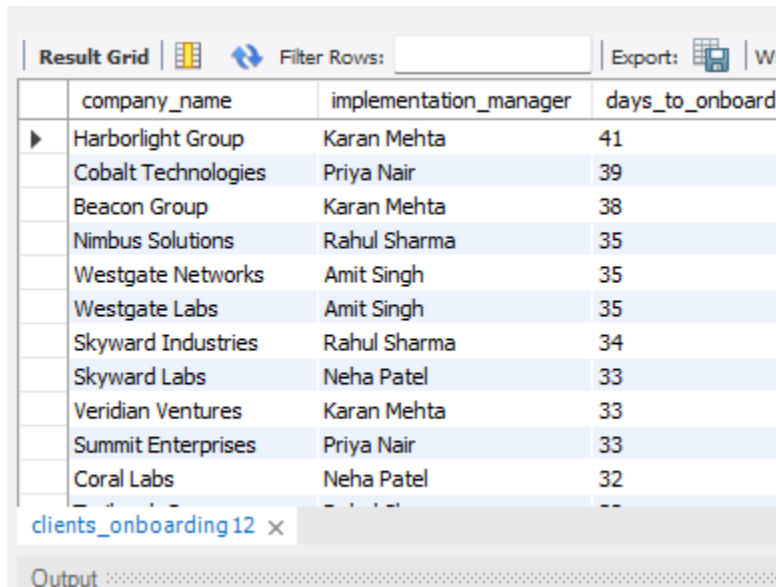

The screenshot shows a SQL query result grid with one column: 'avg_implementation_days'. The first row shows a value of 21.40. The interface includes a 'Result Grid' tab, a 'Filter Rows' button, and a '+' icon to expand the table.

avg_implementation_days
21.40

Business Purpose: Measure implementation efficiency.

3. SLA Breach Analysis

```
SELECT company_name,  
       implementation_manager,  
       days_to_onboard  
FROM clients_onboarding  
WHERE sla_met_14_days='No';
```

The screenshot shows a database query result grid with the following data:

	company_name	implementation_manager	days_to_onboard
▶	Harborlight Group	Karan Mehta	41
	Cobalt Technologies	Priya Nair	39
	Beacon Group	Karan Mehta	38
	Nimbus Solutions	Rahul Sharma	35
	Westgate Networks	Amit Singh	35
	Westgate Labs	Amit Singh	35
	Skyward Industries	Rahul Sharma	34
	Skyward Labs	Neha Patel	33
	Veridian Ventures	Karan Mehta	33
	Summit Enterprises	Priya Nair	33
	Coral Labs	Neha Patel	32

Below the table, there is a tab labeled "clients_onboarding 12" and an "Output" section.

Business Purpose: Identify SLA breaches.

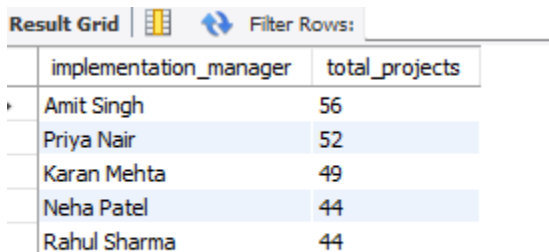

4. Workload by Implementation Manager

```
SELECT implementation_manager,  
       COUNT(*) AS total_projects  
FROM clients_onboarding  
GROUP BY implementation_manager  
ORDER BY total_projects DESC;
```

Business Purpose: Balance workload.

5. Top Delay Reasons

```
SELECT delay_reason,  
       COUNT(*) AS total_cases  
FROM clients_onboarding  
GROUP BY delay_reason  
ORDER BY total_cases DESC;
```

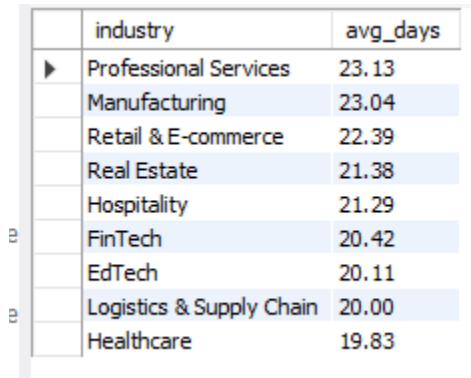

The screenshot shows a database query result grid with the following data:

	implementation_manager	total_projects
▶	Amit Singh	56
	Priya Nair	52
	Karan Mehta	49
	Neha Patel	44
	Rahul Sharma	44

Business Purpose: Find root causes of delays.

6. Industry-wise Implementation Time

```
SELECT industry,  
       ROUND(AVG(days_to_onboard),2) AS avg_days  
FROM clients_onboarding  
GROUP BY industry  
ORDER BY avg_days DESC;
```

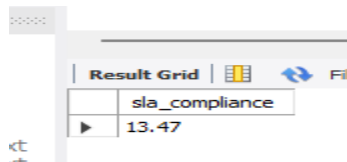

A screenshot of a data table with two columns: 'industry' and 'avg_days'. The table lists ten industries and their corresponding average implementation times in days, sorted in descending order. The rows are: Professional Services (23.13), Manufacturing (23.04), Retail & E-commerce (22.39), Real Estate (21.38), Hospitality (21.29), FinTech (20.42), EdTech (20.11), Logistics & Supply Chain (20.00), and Healthcare (19.83).

industry	avg_days
Professional Services	23.13
Manufacturing	23.04
Retail & E-commerce	22.39
Real Estate	21.38
Hospitality	21.29
FinTech	20.42
EdTech	20.11
Logistics & Supply Chain	20.00
Healthcare	19.83

Business Purpose: Identify slow industries.

7. SLA Compliance %

```
SELECT ROUND(SUM(CASE WHEN sla_met_14_days='Yes' THEN 1 ELSE 0 END)*100.0/COUNT(*),2) AS sla_compliance  
FROM clients_onboarding;
```

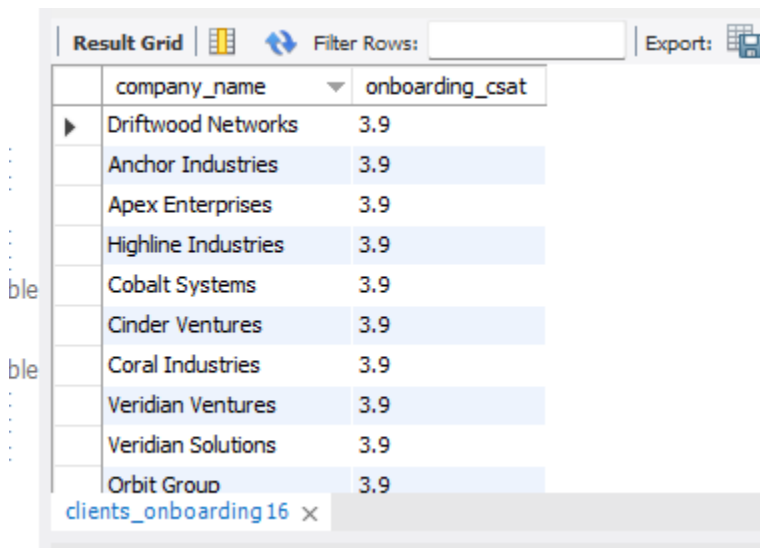

A screenshot of a 'Result Grid' interface showing a single row with the column 'sla_compliance' and a value of 13.47.

sla_compliance
13.47

Business Purpose: Measure SLA performance.

8. Low CSAT Customers

```
SELECT company_name,  
       onboarding_csat  
FROM clients_onboarding  
WHERE onboarding_csat < 4;
```

A screenshot of a 'Result Grid' interface showing a list of companies with an onboarding CSAT score of 3.9. The table has two columns: 'company_name' and 'onboarding_csat'. The companies listed are Driftwood Networks, Anchor Industries, Apex Enterprises, Highline Industries, Cobalt Systems, Cinder Ventures, Coral Industries, Veridian Ventures, Veridian Solutions, and Orbit Group. The interface also shows a 'Filter Rows' field and an 'Export' button.

company_name	onboarding_csat
Driftwood Networks	3.9
Anchor Industries	3.9
Apex Enterprises	3.9
Highline Industries	3.9
Cobalt Systems	3.9
Cinder Ventures	3.9
Coral Industries	3.9
Veridian Ventures	3.9
Veridian Solutions	3.9
Orbit Group	3.9

Business Purpose: Identify unhappy customers.

9. Onboarding vs Renewal

```
SELECT r.renewal_outcome,  
       ROUND(AVG(c.days_to_onboard),2) AS avg_days  
FROM clients_onboarding c  
JOIN renewals_healthscore r  
ON c.client_id=r.client_id  
GROUP BY r.renewal_outcome;
```

Result Grid			Filter Row
	renewal_ou	avg_days	
►	Renewed	17.03	
	Churned	15.17	
	Renewed	20.00	
	At Risk	14.43	

Business Purpose: Measure onboarding impact on renewals.

10. Which industries have the highest customer health score?

```
SELECT  
  c.implementation_manager,  
  COUNT(*) AS total_projects,  
  SUM(CASE WHEN r.renewal_outcome = 'Renewed' THEN 1 ELSE 0 END) AS renewed_projects,  
  ROUND(  
    SUM(CASE WHEN r.renewal_outcome = 'Renewed' THEN 1 ELSE 0 END) * 100.0 / COUNT(*),  
    2  
  ) AS renewal_rate  
FROM clients_onboarding c  
JOIN renewals_healthscore r  
ON c.client_id = r.client_id  
GROUP BY c.implementation_manager  
ORDER BY renewal_rate DESC;
```

	implementation_manager	total_projects	renewed_projects	renewal_rate
►	Karan Mehta	20	15	75.00
	Priya Nair	17	12	70.59
	Amit Singh	19	13	68.42
	Neha Patel	22	13	59.09
	Rahul Sharma	16	9	56.25

Business Purpose: Measure the effectiveness of each Implementation Manager by calculating their customer renewal rate.
